# BOOK REVIEW

by Ananya Gupta

It's about a young girl named Matilda Wormwood, who has an incredible intellect and magic powers, including the ability to levitate objects. She is a lover of books, and can read stories meant for adults by the age of four. Her clear intelligence goes unnoticed by her uncaring family, who often treat her badly. Matilda is an exciting protagonist for children to follow. She is brave, clever and a bit of an outsider to her family. Though growing up in hard circumstances, she still sees the good in the world. Early in the book, we are treated to some funny examples of Matilda getting her own back on her parents, like gluing her father's hat to his head, and sticking a parrot in the chimney to make them think there's a burglar or ghost around. **YOU MUST READ THIS BOOK!!**

## The Lottery by Shirley Jackson

**Town people gather to partake in a disturbing tradition- origins of and reasons for which we are not told. There is mention of bigger towns, where the lottery takes two days, and talk of other radical towns where the lottery has been eliminated all together. To follow their lead would mean regressing to living in caves and “eating stewed chickweed and acorns.” Each head of family must draw from an heirloom box a slip of paper. He who draws the slip with the black, circular mark is chosen his family must draw again. The member of his family who draws the marked slip will be stoned, presumably to death, by the rest of the town, including the remaining family members. The tone, at first, is both ominous and mundane. As the townspeople gather in the June sun, they banter with familiar ease – “Wouldn’t have me leave m’dishes in sink, now, would you, Joe?” --- but beneath the banal, the mood is decidedly baleful. When the black spot is drawn, the mood, along with the color scheme, shifts dramatically: both are immediately drained of the bucolic and sonorous. The rest of the story is starkly depicted in black, white, and harvest orange.**

## When I see nature

by Dishita Verma

**When I see nature**

**The thoughts of my family fog my mind  
The way it fogs a wintry morning**

**My father suited-booted looking all mature  
appearing as mysterious as mother nature  
He has a grin on his face**

**Resembling the leaves smiling after the rain of days**

**My mother rummaging around the kitchen  
Resembling a lioness whose looking for prey, all fierce  
Because her family is hunger stricken  
She has warmth in her hugs  
Resembling the snug  
A lioness gives her cubs**

**My sister giving me wisdom  
Appearing as wise as the mighty elephant,  
There is logic and sweetness in her words  
Sounding sweeter than the song of birds**

**Co-dependence, the rule of nature  
I smile and grin as I remember  
The co-dependence running through our family  
Resembling the same as the one in nature's biggest family**

# 3 foods to eat in Winter

By Dhaiyra-vir rana 

- Nuts
- Almonds and walnuts are the best winter foods that will keep your nervous system healthy during the winters, boosts insulin sensitivity, and promotes a healthy heart due to the high content of vitamin E and omega fats.

- Oats
- More than being just a comfortable breakfast food, oats contain nutrients that are important for the winter, like zinc which boosts immunity, and soluble fibers which are important for a healthy heart, better digestion and bowel movements. Winters make us more susceptible to constipation due to reduced water intake, so a warm oat-porridge shall help relieve or prevent this!

- Broccoli and cauliflower
- Cruciferous veggies are important for immunity during winters as they are rich in vitamin C, which is known to boost immunity. They can fight off the cold and keep you active during this season.

Comet ISON seen making a close approach to the sun in 2013. A newly discovered comet, C/2023 A3, will appear far brighter in the sky if it survives the sun's rays in fall 2024. (Image credit: NASA)

A newly discovered comet may appear as bright as a star in the night sky by fall 2024. The comet, known as C/2023 A3 (Tsuchinshan-ATLAS), was first noted by the Asteroid Terrestrial-impact Last Alert System (ATLAS) telescope project in South Africa on Feb. 22, according to the Minor Planet Center(opens in new tab). Astronomers at the Purple Mountain Observatory in China also discovered the comet independently on Jan. 9, so both observatories are cited in the comet's full name. Skywatchers around the world have since observed it in new and old images, with the earliest detection found in images taken by a wide-field camera on a telescope at Palomar Observatory in California on Dec. 12, 2022.

Currently, C/2023 A3 is between Saturn and Jupiter, according to EarthSky(opens in new tab). It's traveling at a zippy 180,610 mph (290,664 km/h) and is likely to make its closest approach to Earth on Oct. 13, 2024.

## BOOK REVIEW :The Lottery by Shirley Jackson

A stunning graphic adaptation of a chilling classic.

Hyman, grandson of Shirley Jackson, original author of "The Lottery," offers his interpretation of her iconic story. In it, townspeople gather to partake in a disturbing tradition—the origins of and reasons for which we are not told. There is mention of bigger towns, where the lottery takes two days, and talk of other, radical towns where the lottery has been eliminated altogether. To follow their lead would mean regressing to living in caves and "eating stewed chickweed and acorns." Each head of family must draw from an heirloom box a slip of paper. He who draws the slip with the black, circular mark is chosen; his family must draw again. The member of his family who draws the marked slip will be stoned, presumably to death, by the rest of the town, including the remaining family members. Hyman's illustrations are powerful: rich and evocative graphic realism, softly colored, marrying Rockwell-ian and American Gothic style. The tone, at first, is both ominous and mundane. As the townspeople gather in the June sun, they banter with familiar ease—"Wouldn't have me leave m'dishes in the sink, now, would you, Joe?"—but beneath the banal, the mood is decidedly baleful. When the black spot is drawn, the mood, along with the color scheme, shifts dramatically: both are immediately drained of the bucolic and sonorous. The rest of the story is starkly depicted in black, white, and harvest orange. The most unnerving illustration depicts a small boy taking up a fistful of child-sized rocks to aim at his pleading mother.

# HAPPY WOMEN'S DAY

Women empowerment implies the ability in women to take decisions with regard to their life and work and giving equal rights to them in all spheres like: personal, social, economic, political, legal and so on.

Women empowerment is the much-talked about issue today. Women are increasingly getting empowered to decide the course of their life and professions and realize their fullest potential. They profess an independent outlook, whether they are living inside their home or working outside. They are increasingly gaining control over their lives and taking their own decisions with regard to their education, career, profession and lifestyle.

As women were not allowed to make decisions for them, women's empowerment came in like a breath of fresh air. It made them aware of their rights and how they must make their own place in society rather than depending on a man. It recognized the fact that things cannot simply work in someone's favour because of their gender. However, we still have a long way to go when we talk about the reasons why we need it.

Parents Worship Day motivates the positive spirit of serving parents in the heart and soul of the children. This festival draws its inspiration from the pooja of Lord Shiva and Maa Parvati performed by little Ganpati.

The idea is to spark the importance of cultural values our Indian heritage holds in Indian children. Parents Worship Day is all about strengthening family bonds and being grateful to our parents for everything they do for us selflessly giving us an example of true and pure love.

# LAST DAY OF SCHOOL!

The last day of school is a bittersweet experience for both students and teachers alike. It marks the end of a long academic year, filled with memories, friendships, and learning experiences. It signifies the completion of another successful school year.

On the last day of school, students and teachers alike come together to celebrate the end of the academic year. There may be class parties, games, and activities planned to commemorate the occasion. Teachers may give their final words of wisdom, imparting lessons and advice that will stick with their students for years to come.

For students, the last day of school can be emotional. It marks the end of a routine they've grown accustomed to for the past several months. They'll say goodbye to friends they've made, some of whom they may never see again. They'll leave behind familiar surroundings and routines, and embark on a new journey, whether it be the next grade level or a new school.

But the last day of school also signifies a new beginning. The academic break provides a chance to explore new interests, travel, and spend time with family and friends. Students can take the lessons they've learned in the classroom and apply them to real-world experiences.
