Our Writers

Hello Friends,
Today I am going to tell you about my **MY SECRET SANTA**. It was Christmas time as usual...me and my friends were having fun and were discussing about the gifts that Santa will give us this year. Even though I wanted a new green bicycle but I never told any of my friends about it. As Christmas eve came I was hung a pair of stockings underneath the Christmas tree that me and my parents had decorated with glow balls and lights. Even though I hung the stockings I was sure that Santa would not gift me a cycle. As the time passed we enjoyed our hot cakes and other nibbles that my parents had brought. As night fell I got scared till we kept with the sleep thoughts (wonder whether Santa will fill all my socks or not). In the morning I heard some sounds from outside I peered the window and saw my mother and father putting a brand new cycle just what I wanted outside our gate...I so-and-sure there is and how the challenge filled with excitement. My parents told me to finish newspaper from our table. I was there and observed me with happiness on seeing the cycle and my mom and dad told me that surely Santa had left the cycle outside. Even though I knew the reality I kept it a secret till now. Friends parents are the secret Santa's in a kids life and being their friends to fulfill our wishes. I am sure there may be secret Santa's in your life too.

Sadaf

I miss school
I miss school.
I didn't think I would
but now I think it's cool.
I miss my friends,
can't wait to see them
when school is over.
I will do my best
and concentrate
when I will do my best.
I thought lessons are boring
but it's better than
being at home bored and sleeping.
Being at home makes me sad
it makes me miss
school and not that bad.
I miss school!

National Pollution Prevention Day

National Pollution Prevention Day is observed on 2nd December in India. This day is observed in the memory of people who lost their lives in Bhopal gas calamity. Bhopal gas tragedy occurred in the year 1984 on the night of 2–3 December. Many people died due to poisonous gas Methyl Isocyanate also known as MIC. Bhopal Gas Tragedy is considered as one of biggest industrial pollution disasters.

It is very difficult to tackle and handle the situation of Pollution when there is a Big effect of Pollution in the Environment. Pollution is involved due to many of the reasons like the Bursting of the Crackers, Vehicles running on the Roads, Bomb Blast in some areas and many other reasons.

The pollution problem is nowadays getting bigger in many of the Countries, and the Government needs to reduce or stop the Pollution from many of the Ideas and Plans. The government has every type of plan to reduce Pollution as it can't be able to remove the pollution from every Country.

It is very important to manage the Pollution for making the Environment clean and better to live in it. Every people in the World are used to live in a proper environment where there is no pollution in it.

People need to get every knowledge of the Pollution to reduce it for making a better World of Clean Environment without Pollution. In Delhi, There is a lot of Pollution problem caused due to the Vehicles and other Reasons by which people are used to getting suffered by many of the Diseases. There is a lot of Pollution that happens due to the chemicals Waste coming from the Industries and going into the air which pollutes the environment. Industries should take many preventive measures to reduce Pollution as much of the Pollution happens due to many types of small as well as Big Industries.

NATIONAL MATHEMATICS DAY

Mathematics is a very interesting subject. From its rich history to different tricks and tips, mathematics lays down a number of amazing facts to help students get involved with this subject in a better way.

Some interesting mathematical facts:-

- ❖ The word "hundred" comes from the old Norse term, "hundrath", which actually means 120 and not 100.
- ❖ There is only one number in the entire Hindu Arabic number system which can be spelled with the same number of letters as itself. That number is four.
- ❖ Seven is the most significant number across religions and cultures. For example, seven colours in a rainbow, seven days in a week, seven notes on the musical skill, etc.
- ❖ The signs Plus (+) and Minus (-) were discovered as early as in 1489 A.D.
- ❖ In the Indian number system, 6 appears first in 1000 ("one thousand").
- ❖ If you multiply 6 by an even number, the answer will end with the same digit. Example: $6 \times 4 = 24$.
- ❖ If you multiply any number by 9 and then add the digits sum of digits will be always 9
- ❖ To multiply any two-digit number by 11, simply add the digits of the number together and then put this sum between the original two digits. Example: $11 \times 53 = 583$ ($5+3=8$)

CHRISTMAS

SANTA ON CHRISTMAS

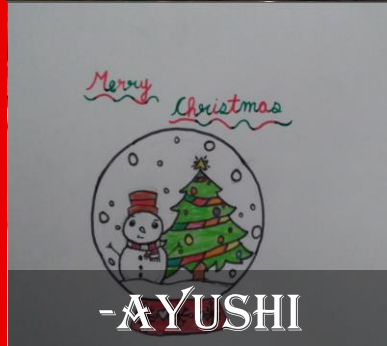

Get ready this Christmas,
For Santa will come.
He'll be giving toys.
The ones that you'll love.
You should be nice.
And never be naughty.
Because if you do.
He will give you nothing.
The ride that he has.
And reindeers and slay.
With Rudolph in front.
As the light and the way.
For the whole year round.
You should be a nice kid.
So they'll drop your gifts.
Through the chimney in your place.

REPUBLIC DAY

Republic day is a national festival of India. We celebrate this day on 26th January every year. On 26th January 1950 India became republic. Our constitution came into force on this day. The constitution of India is the supreme law of India and it is the largest written constitution in the world. It gives us fundamental rights like freedom of speech, education, religion and more.

Every year, this day India celebrates with great pride and happiness all over the nation. On this auspicious occasion in Delhi, Our President hoists flag and parade is organised on Rajpath from Vijay Chowk to India Gate. In this parade the armed forces display their vigour, enthusiasm and weaponry. Bravery awards are also given to citizens and children of the nation to motivate people and give them a sense of nation.

Schools, colleges and other educational institutions celebrate this day with great pomp and show. Our nation is the greatest nation in the world but let us strive to make it even more better.

Let`s honour our military,
The men and women who serve,
Whose dedication to our country,
Does not falter, halt or swerve.

Let`s respect them for their courage;
They`re ready to do what`s right
To keep India safe,
So we can sleep better at night.

Let`s support and defend our soldiers,
Whose hardships are brutal and cruel,
Whose discipline we can`t imagine,
Who follow each order are rule.

Here`s to those who choose to be warriors
And their helpers good and true;
They`re fighting for Indian values;
They`re fighting for me and you.

Dedicated To Army

Indian Navy Day

- Each year, India celebrates Navy Day on 4th December.
- Indian Navy works to maintain peace on the maritime front.
- Navy force also takes care of the seaport visits and foreign marine visits.
- The day observes the contribution of the Indian Navy as a token of gratitude.
- On Navy Day, the nation also pays homage to the soldiers who laid their lives for the nation's safety.
- The celebrations for the day begins a week before the actual date.
