HISTORY OF LEGO

LEGO is a line of plastic brick construction toys that are manufactured by the LEGO Group, a privately held company based in Billund, Denmark. The LEGO Group began in the workshop of Ole Kirk Christiansen, a carpenter in Billund. In 1934, his company came to be called "LEGO" which means "play well". LEGO had a big sale even in both world wars. Ole's factory got burned, but in 1947 they started to make it all better. In this year they started to make plastic toys. In 1949 LEGO began producing, among other new products, an early version of the now familiar interlocking bricks, calling them "Automatic Binding Bricks".

6 FACTS FOR INTERNATIONAL TIGER DAY

Tigers are the largest cat species in the world, unless Totoro is classified as both Felidae and Leporidae.

Tigers are exceedingly endangered, having lost over 90% of their natural habitat and numbering barely over 3,000 in the wild.

White tigers are not considered albino, since they have striped markings and green or blue eyes. They also no longer want to be considered for Las Vegas acts.

All tigers avoid Tigger at parties, the annual meetings, and his autobiographical play he keeps trying to get friends to see.

Ligers—born of a male lion and a tigress and the largest of all tigers—possess no magical powers outside of being able to guess what number you are thinking so long as it is "3."

Tony the Tiger can indeed speak and tried to lead a revolution to create a Planet of the Tigers, but then he got a call from his agent about a commercial gig.

-Kartik Jain

**Look at the tigers
mighty and strong,
killing them for their
skin is very wrong.**

D o you know?

ORANGES WERE ACTUALLY GREEN IN COLOUR

The first oranges ever imported from to the West were from Southeast Asia were green in colour . In fact, oranges grown in warmer parts of the world such as Vietnam and Thailand stay green throughout their lifetime.

RUSSIA HAS MORE SURFACE THAN PLUTO

With 6,601,668 square miles of land mass, Russia beats Pluto's 6,427,805 square miles of surface area . -Kartik Jain

Let's Craft

Pink Flower Wall Hanging

What You Need

- 2 Pink Charts
- 2 Cardboards
- White Sheet
- Pencil
- Scissors
- Hot Glue Gun
- 1 Black Chart

Procedure

Take the pink chart and cut out squares from it and fold the square into triangle. Now fold the triangle to both the sides. Now make the shape of petal and in the shape now join all the petals on each other to make a flower. Now cut out a black strip and roll it and stick on the flower. Make such 6 flowers. Take the black chart and cut out rectangles and draw the leaves on the stem. Take the cardboard and draw a big circle and cut it do the same on the other cardboard but this time the circle should small. Now stick the cardboards with each other and paste all flowers and leaves on them.

-Aikya

It's ready!

Take Time

Take time to work. It is the
PRICE OF SUCCESS

Take time to meditate. It is the
PRICE OF POWER

Take time to play. It is the
SECRET OF
PERPETUAL YOUTH

Take time to READ. It is the
WAY TO KNOWLEDGE

Take time to be FRIENDLY. It is the
RAOD TO HAPPINESS

Take time to LAUGH. It is the
MUSIC OF THE SOUL

Most importantly take time to LOVE
AND BE LOVED!!

-Bhumika

KID - Why some of your hair
are white dad?

DAD — Every time a son
make his dad unhappy , one
of his father's hair turns
white....!

KID — Now understand why
grandpa's hairs are all white.

North Korea and
Cuba are the only
places you can't
buy Coca-Cola.

Thank You All

“Thank you so much for all your hard work and support during this difficult time. Your humility, kindness, and strength are greatly appreciated. Thank you for being **our nation's guiding light** in the face of this adversity.”

Veg Sandwich

Ingredients

- Boiled, mashed potatoes
- Bread
- Chopped tomatoes, onions, capsicum, green chilies
- Coriander leaves
- Salt to taste
- Black pepper powder
- Chat masala
- Cheese slice

Procedure

Put all the ingredients together in a bowl and mix well. Put the mixture on two bread slices and a cheese slice in between them. Heat a pan and grease it with oil. Put a sandwich in the pan and cook it. Flip it and toast from both sides.

-Bhumika

Enjoy It!!

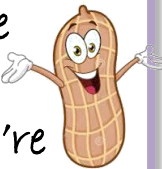

What kind of candy is never on time?

A: Choco-LATE

What did the bread say to the peanut butter?

A: "I think You're NUTS!"

Teasers And Puzzles

Rapid Fire

1. Where can you find cities, towns, shops and streets but no people?
2. What is so fragile that saying its name breaks it?
3. What word is spelled wrong in every dictionary?
4. What has 88 keys, but cannot open a single door?
5. Who can shave 25 times a day but still have a beard?

Logical

You are a bus driver, 8 people get on, 2 people get off, 2 more people get on and another 1 get off. Finally, 3 more people get on and 2 get off again. How old is the bus driver?

Try Out

1. What do you call a fish without an eye?
2. What's orange and sounds like a parrot?
3. The blue man lives in the blue house and the red man lives in the red house. Who lives in the white house?
4. If you threw a white stone in a Red Sea, what would it become?

- Try Out**
1. Fish
 2. A carrot
 3. The President
 4. Wet

Whatever your age is (you're the driver).

Logical

1. A Map
2. Silence
3. Wrong
4. A piano.
5. A barber.

OUR NATIONAL HERITAGE- INDIA GATE

SIDDHARTH

What is India for me...??

By- Nahve Goyal

What is India for me..?

A land of heritage yet untint
the historical monuments,
beauty so much,
various beliefs,
through a single feeling

What is India for me..?

The beautiful culture,
the incredible diversity,
the historical monuments,
the divine traditions,
This exquisite heritage...

What is India for me ..?

From Kashmir to Kanyakumari,
from Assam to Gujarat,
different people with varying
languages,
our heritage is our pride,
respect it and preserve it at any
price.

Maths- A Challenge

Try, try and try

The more I try,

The more I cry,

I practice maths with my heart and soul,

Yet I am not able to achieve my goal.

I never get marks in maths,

Inspite of my great endeavours

Fate is never in my favour.

I really want to improve my maths,

Because I love this subject,

And for this I am trying my level best.

I am candid so I confess,

In mathematics examination I always create a mess,

all the answers I guess,

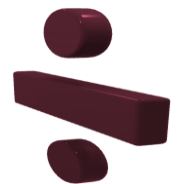

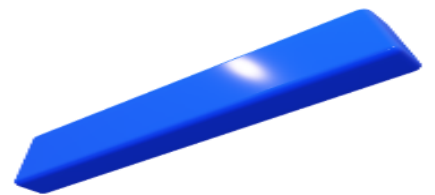

And ultimately the marks I get are quite less.

I believe that if I do ample practice,

I'll one day probably achieve my goal,

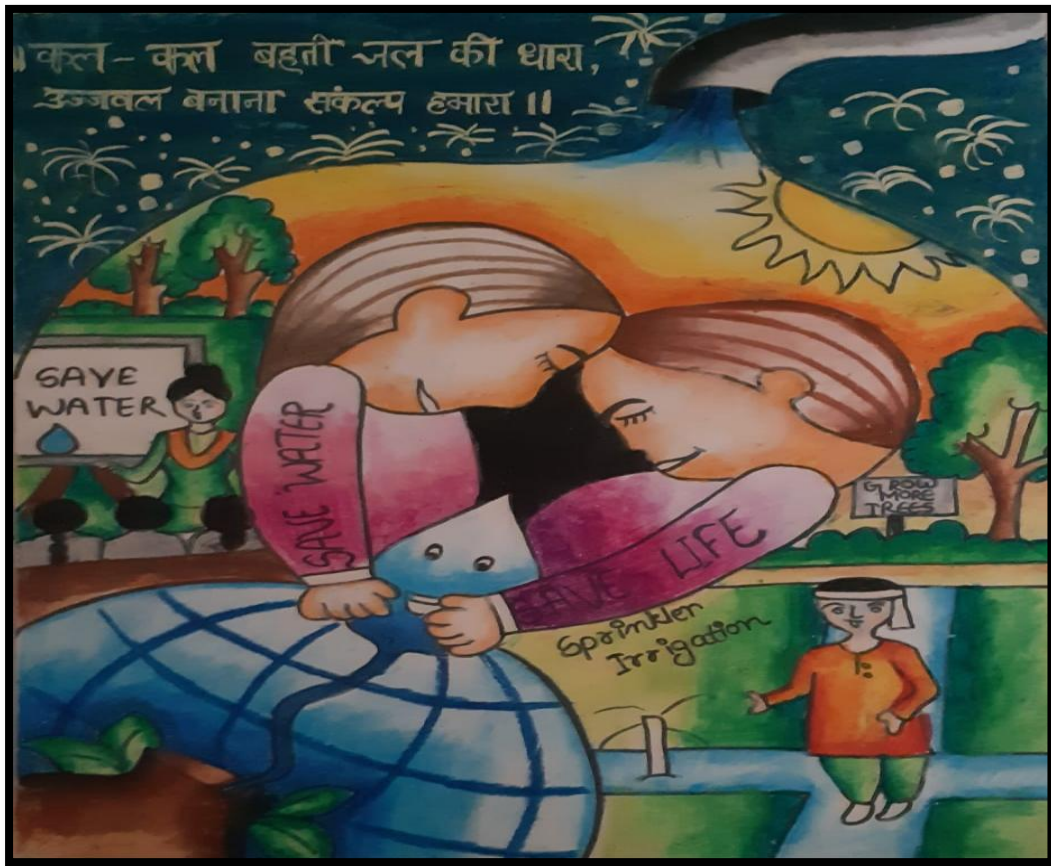

And I seriously have to improve,

Because in our lives maths plays a very important role.

SAVE WATER – BY VANI

How to Stay Healthy During COVID 19

Health is a very important aspect of everyone's life. **Health is wealth** is a very common proverb given by Ralph Waldo Emerson which means that when we maintain good health, everything else falls into place. Healthy and fit people enjoy their lives with great joy and peace. Money may buy all the luxuries in the world, but it cannot buy good health. Better health is central to human happiness and well being. There is a direct relationship between the diet, physical activity and health. Nutrition is a key player when it comes to physical, mental and social well-being. And it is important for preventing disease. One should try to keep regular routines and maintain a daily schedule which includes sleeping, meals and activities. One should stay socially connected. Feelings should be shared with the loved ones. Green and fresh vegetables, milk, fresh fruits, etc. should be taken to remain healthy.

Stay Positive and Have Fun

BY- SAMIYA

Months of the year

Months of the year

Listen closely from the ear

First is January and

This month is so cold

I think study is the best treasure and gold

Second is February and in

this month trees blossom

Can't guess which is this season

Third is March which is exams time

Some study while some play with slime

Fourth is April and schools restart

Children think no study only play games like dart

Fifth is May, May and yes May

Go do fun, study and play

Sixth is June the month of holidays

Go join a drama class and do acts and plays

Seventh is July July July

Birds fly fly fly...

Eighth is August the month of rain

For body exercise is the main

Ninth is September, also a month of exams

Study only study is always said by Teachers and Moms

Tenth is October, month of festivals like Diwali

When its Diwali, people in Maharashtra say Aali re Aali diwali Aali

11th is November, Month of guru

To ho jaaye winter shuru...

Last is December and who comes....

Yes Santa...

We do parties with pizza and a fanta..

WORK

**WORK AND LIVE BY YOUR HONEST BREAD
SALUTE TO THOSE WHO MIND THEIR OWN HEAD
BLESS THOSE SOULS WHO WORK WITHOUT GOSSIP
FOR THEM WORK IS WORSHIP, GOSSIP IS POISON
TO SIP**

**WORK WORKS LIKE MIRROR
IT IS REFLECTION, A DARK SHADE
IT SMILES BACK, IF YOU SMILE
IT SCOWLS, IF YOU SCOWL
WORK IS ALSO AN ECHO
IT ROARS BACK, IF YOU ROAR
IT LAUGHS BACK, IF YOU LAUGH**

**SO, LET TIME WITNESS THE PRESENCE OF YOUR
GLORY
LET UNIVERSE BEAR THE DENT OF YOUR STORY
DON'T FORGET, WORK DESPAIRS THE COWARD BUT
FAVORS THE BRAVE,
YES, IT ALWAYS FAVORS THE BRAVE.**

Jokes

Bob: "When I drink coffee, I can't sleep."
Bob: "Is that so?" My problem is exactly the opposite.
Bob: "Really?" How so?
Bob: "When I sleep, I can't drink coffee."

First Footballer: "I have more fans than you!"
Second Footballer: "No big deal, my house has an AC!"

Sonu: "Did you hear about the Italian chef who suffered from a terminal illness?"
Monu: "What happened to him?"
Sonu: "He pasta-way!"

DID YOU KNOW?

The World's Oldest known creature, A Mollusc, was 507 year old until scientists killed it by mistake.

CD KEY HOLDER

MATERIAL REQUIRED:-

3cd's, 2 packets mouldit, paint brush-flat and rounded, Neon Acrylic Paints, 3 key hooks, fevicol

METHOD:-

- Join cd's by placing one over the other with the help of fevicol. let it dry for 10 min.
- Mix half of softner mouldit with other half mouldit it very well. Can use little talcum powder.

- Give shape of petals and flower before it dries.
- Draw patterns on the CD & paste them with fevicol.
- Keep aside for atleast 6 to 8 hours to dry.
- Finally paint CD base with flat brush using dabbing technique & later petals with colour of your choice.
- With the help of mouldit dough fix Key hooks

And our CD key holder is ready!!!

POEM - ENVIRONMENT

WHAT WE CAN DO ?

When you see litter in the streets
And the air smells of pollution
When you feel it's all piling up
Remember there is a solution

There's something each of us can do
To keep the rivers clean
To keep fresh the air we breathe
And help others understand

Help clean a beach
Or recycle bottles and cans
Learn about the problems we face
And keep the forests green

It doesn't have to be a lot
If we each just do our share
So take time out on Earth Day
To show the Earth you care

By AVIKA TALWAR

बदलते रिश्ते

आज का दौर बदला नज़र आता है
समय का पल थम सा जाता है

डर के साथ में जिदुगी के
मायने बदल गए हैं

जो कभी साथ थे
वो कोरोना के बवंडर में बिखर गए हैं

आज दो गज की दूरी में रहना सीख रहे हैं
खुले आसमान में भी अपने-आप को छुपाना सीख रहे हैं

वक्त हमे इस दौर में ले आया है
जहाँ हम अपने-अपनी से भी छिप रहे हैं

खुदा कर्म कर अपने बन्दों पर
एक नई रहा दिखा दे

हम फिर मिल-झुल कर रहे
ऐसा नया गुलिस्तान बना दे

Foe is near...

The things, the trees, the buildings we see,
Are blessings of mother earth.
Everyone can save it's fauna and worth
but more odious can it be?

The yelling of nature we hear,
But do not respond.
The journey of fish to heaven from pond,
We see, the foe is near.

The earth is grovelling below us,
but what matters! we don't care.
Poison created by car and bus,
exactly, is not fair.

Our mother is either antique or modern,
No goutes on this.
Next time we should be more concerned,
The flight hasn't missed.

The sneer we are giving, to the earth,
is a sin.
So don't demolish the house of nature
because, its our mother's fin.

:- CHAYANIT JANGRA.

*Life is like gardens and friends
are flowers,
they give us energy to climb
towers.*

*Friends company us to play
outdoor games, they help us to
decide our aims.*

*We go to school and study
together,
and wish that we will be best
friends forever.*

पेड़ लगाओ ...

पेड़ है तो कल है
पेड़ों से हर पल है
पेड़ हमारी सम्पदा
हैने जीने का मजा
पेड़ जो उगाओगे
सुन्दरता बढ़ाओगे
पर्यावरण सुधारेगे
सबमें जीवन बढ़ाओगे
पक्षी चहचहाएँगे
सबका दिल बह्लाएँगे
पेड़ों से तुम करो प्यार
जीवन में हो मंगलप्यार
खुशी-खुशी हम गाएँगे
मिल कर पेड़ लगाएँगे

एक दो तीन चार
पेड़ लगाओ कई हजार
पांच छः सात आठ
पेड़ लगाओ बारस बार ।

हम सब ने यह दानी है
धरती हरी बनाती है
धरती हरी बनाती है
धरती हरी बनाती है ।

TECHNOLOGY WITH EDUCATION

Education is wisdom. Wisdom is knowledge. And nowadays knowledge is not possible without technology. With time everything changes. Even the ways to impart education have changed. Earlier, our parents and grandparents used to study from just books. But these days we study not only from books but also technological sources like mobiles, laptops, tablets, etc. as per our convenience. Thus, education too has added an essence of technology to itself. Technology is actually very productive if we use it properly. These days during lockdown period, all our school work is coming online and our virtual classroom is also being created on online platforms. Use of technology in education sector was introduced in early 10s. But as the time flew, the use of technology was misused. Many phishing sites took advantage of posting spam mails which in return steals our personal information.

The advent of communication technology was welcomed with open arms because it promised advancements in knowledge sharing which in turn would significantly enhance development in all spheres of modern life: commerce, medicine, transportation, construction, and education among others. However, the experience in the 21 century reveals that modern societies were not well prepared for this technology And unfortunately, modern man is currently struggling to rise above the ills of modern technological advancements and seek out more and newer beneficial ways to utilize the wide array of available technology, most prominently,

We students are missing our teachers for their scolding and their motivation. The bond that the teacher and pupil carry can't be replaced by technology. Technology can appreciate only to the extent it has been programmed to. The precious treasure of knowledge that a teacher has is endless. Technology can just provide us with knowledge but cannot motivate us as our teachers. Technology can certainly not replace teachers.

At the end I would conclude with. "Technology Cannot Replace Great Teachers, But Technology In The Hands Of Great Teachers Can Be Transformational."

By Nehal Khurana

Ramifications of Child Labour

Child labour is the exploitation of children with any form of work which deprives them of their childhood and /or interferes with their ability to attend regular school and is socially, morally, physically and mentally harmful. Jobs such as manufacturing, mining, domestic help or use of children in armed conflicts comes under this category. Whereas helping parent or earning pocket money after school hours is not child labour. People under 6 – 14 are classified as children. There are various reasons of child labour.

One of its main reasons is poverty. People living below poverty line often rely on child labour to increase their chances of getting basic necessities, so children work as labourers. Lack of education in parents is also one of its cause as they don't know the importance of education so they send their children to work. Though government has provided free and compulsory education yet it also does not work for most of them as they are made to evade school by their uneducated parents involving them in labour. Lack of stringent checks by government leads to people violating existing laws regarding child labour. In businesses such as manufacturing, and import-export there are multiple layers of work so employers often employ cheap labour in the form of children and the government is not able to trace where child labour is. There are very serious ramifications of child labour.

One of the main consequences is further continuation of poverty and illiteracy. Child labour doesn't yield much money and as mentioned earlier deprives children of education. This implies that the children as adult grow up as poor illiterates hence, creating a vicious cycle of poverty, illiteracy and child labour to get formed and continue. Further these jobs are highly insecure as they involve many professional hazards like the sorters disease. It not only causes the mentioned health hazards but also there is no assurance of permanent job in this unorganised sector. It results in widening the gap between the rich and the poor. The poor get poorer, the rich become richer.

Child labour also leads to a shortage of educated and trained professionals. It means poor quality of the human resource of the country which is atrocious for our economy. Our government has taken some steps to check this crime.

One of them is The Child Labour Act 2016, which provides mandatory and free education for all children between 6-14 years of age. A national child helpline has also been launched by the government to save children from all sorts of crime and exploitation. Now the government is educating people about child labour and it has now been declared a crime under the law. These steps are certainly commendable but we can't get satisfied only with this much. There is still lot more to do to stop this heinous crime. More awareness campaigns should be run to spread awareness as it is a big weapon against such social evils. Government must finance organisations who protect and rescue children from such exploitation. Rehabilitation centres should be made to help the victims recover after being rescued from labour sites. More and more NGOs should be encouraged and involved in this task. This will go a long way in ending child labour.

ANIMALS - STOP THE CYCLE OF VIOLENCE

If having a soul means being able to feel love, loyalty and gratitude, then "ANIMALS" are better off than a lot of "HUMANS"

Everyday countless cats, dogs and other animals suffer and die at the hands of very few people who are supposed to take care and protect them. Emotional abuse, physical violence and life threatening neglect are daily realities for many animals around the globe.

There was a day when the newspaper was filled with the heart thumping news of girls getting raped, sexually abused and physically and mentally tortured. But now the tables have turned and it doesn't mean that abuse against girls has stopped but they are increased against animals. Yes guys you heard it for right it is heart-breaking to read the news of animals getting raped by some cruel and senseless humans.

Yesterday going through the newspaper I came across a news stating that a person raped a cow of his dairy when no one was around but it was captured in the CCTV's cameras.

Not only this, In a small town of Kerala

some villagers in a way of mocking and fun filled a pineapple with crackers and fed that pineapple to a pregnant elephant and to later found the elephant died standing in the middle of a river. These news make me sad and what make me more sad is the law in our country.

If there is no strict law if a animal suffer from any neglect or abuse they are just sent to some NGO, and for care and once they are healed they are again sent back on streets.

People should start caring and loving animals. If they cannot afford to adopt them or be with them 24x7 then atleast do not disrespect and provide them with food. Acc to Animal rescue organisation it has been stated that 75% of the animals die of because of hunger, wash deriving by the youngsters and by neglecting them. The place where animals love you is the happiest place you are in. If you live in a place where animals love you you live in the happiest place on the entire world.

LOVE AND LET THEM LIVE ...

MY VISIT TO HAWA MAHAL

Hawa Mahal, or the 'Palace of Winds' is an iconic landmark of Jaipur, the Pink City of India. It is one of the most famous tourist attractions that see at least 700 tourists visiting it every day. This was told to me by the lady that was manning the tickets counter when I visited this place recently. Jaipur in general and Rajasthan, in particular, is in any case world famous for its rich cultural and architectural history. The Hawa Mahal is the pride of the capital city of Rajasthan.

Unique Feature

Although not exactly a palace, it looks like one from the street. **Hawa Mahal is a five storey building** in the heart of Jaipur. It is made of red and pink sandstone (like most buildings of Jaipur) lined with white color to make it vibrant. The structure resembles a beehive. The palace has carved and arched small chhatris or dome-shaped pavilions showing the richness of vivid Rajput architecture.

The walls of the palace have 953 jharokhas or overhanging balconies from where cool and fresh air can pass. The most unique aspect about the palace is the fact that at all times a **light breeze** passes through it. That is how the palace got its name. A tourist guide also informed us that the Hawa Mahal also denotes Maharaja Sawai Pratap Singh's devotion towards Lord Krishna – the design of the palace resembles the crown of the Lord.

Several parts of the structure also have small lattice windows, chiseled sandstone grill, and decorated domes. Some of the windows are made of wood. Each jharokha has a small chamber where one can sit and view the street. Fountains at the middle of each chamber complimented well with the light wind flowing through the jharokhas thus enhancing the cooling effect of the chambers.

The palace is like a pyramid and has a height of 15m from its base. There are no stairs in the building and top stories can be reached only by ramps. This was done to accommodate the palanquins of the royal ladies.

Not many people talk about the archaeological museum within the courtyard of the palace. It has many artifacts that give an idea of the rich past, the cultural heritage and the lifestyle of the Rajputs.

Some glimpses of Hawa Mahal

AMAZING FACTS

1. The Eiffel Tower can be 15 cm taller during the summer.
Explanation:- When a substance is heated up, its particles move more and it takes up a larger volume – this is known as thermal expansion. Thus due to thermal expansion the Eiffel Tower is 15 taller during summer.
2. Hawaii moves 7.5cm closer to Alaska every year
Explanation:-The Earth's crust is split into gigantic pieces called tectonic plates. These plates are in constant motion, propelled by currents in the Earth's upper mantle. Hot, less-dense rock rises before cooling and sinking, giving rise to circular convection currents which act like giant conveyor belts, slowly shifting the tectonic plates above them. Hawaii sits in the middle of the Pacific Plate, which is slowly drifting north-west towards the North American Plate, back to Alaska.
