# REGARD BEFORE DISCARD

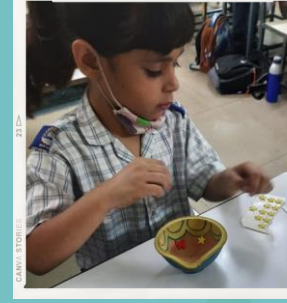

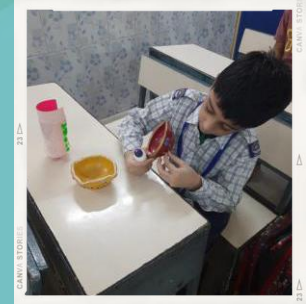

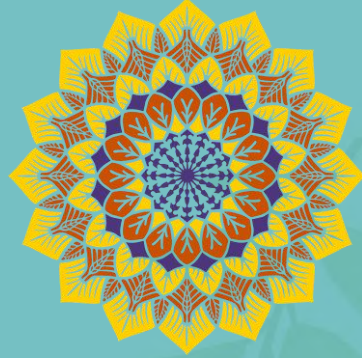

Everyday Wastes such as plastic, glasses, newspapers or electronic are not only waste of limited resources but also are harmful to the environment. This event is to bring such ideas to students and to help them think themselves on such ways of reusing everyday materials that will not only reduce the waste but provide them with useful household products.

The idea will not only be of economic and material value for students, but will be helpful in creating environmental consciousness among them that is the need of the hour.

Six yellow marigolds straight and tall,  
Growing up against the wall.
